Zip Code Overlay is now Active in the MLS system.

To use the zip code overlay to aid in changing your searches you can access the map by clicking on any address that is underlined in blue.

Once you are in the map area simply click on “Zipcodes” in the overlay box.
You can also access the mapping area in ProSearch by using Proximity.

Place an address or simply a zip code and click on find.

Please remember Area and Subarea fields will be removed the night of September 5, 2012 and any new listings entered starting September 6th will not have Area and Subarea fields. This means that if you have searches looking for Area or Subarea they will not find these new listings. Please start editing your searches now so that your clients automated emails will not be disrupted.

Click [here](#) for a detailed tutorial on how to edit your saved searches.
